INSTRUCTIONS FOR ORDERING EXTRAS.

Owing to the many improvements on our Machines, it has become necessary to adopt some system by which dealers and consumers can order extras and be promptly supplied with right pieces, saving them the annoyance of receiving wrong parts:

1st. Observe carefully the number or letter on the casting for which you want a duplicate, and be sure to state that number or letter in your order, with the description following it in the list of repairs for that Machine.

2d. State plainly your Postoffice address, (also Station), County and State to which the goods are to be sent, and whether by express or freight, and via what route.

3d. In ordering repairs, be careful to use same numbers and names as used in these Lists and thus avoid mistakes.

4th. Never give us credit for being able to guess what is wanted, for we never attempt it, therefore vexatious delays will be avoided by being plain and specific.

5th. There are several sizes of many parts, including Drapers, Straw Carriers, Grain Carriers, Jackson Feeders and Sticks for same, Separator Shoes and Screens, Cleaner Screen, Shafting, and it is very necessary to show on your order the dimensions, and to give a full description.

6th. Prepay Freight and Express charges on castings or extras (sample) sent us and put your name on the tag.

INSTRUCTIONS FOR ORDERING EXTRAS.

Owing to the many improvements on our Machines, it has become necessary to adopt some system by which dealers and consumers can order extras and be promptly supplied with the right pieces, saving them the annoyance of receiving wrong parts:

1st. Observe carefully the number or letter on the casting for which you want a duplicate, and be sure to state that number or letter in your order, with the description following it in the list of repairs for that Machine.

2d. State plainly your Postoffice address, (also Station), County and State to which the goods are to be sent, and whether by express or freight, and via what route.

3d. In ordering repairs, be careful to use same numbers and names as used in these Lists and thus avoid mistakes.

4th. Never give us credit for being able to guess what is wanted, for we never attempt it, therefore vexatious delays will be avoided by being plain and specific.

5th. There are several sizes of many parts, including Drapers, Straw Carriers, Grain Carriers, Jackson Feeders and Sticks for same, Separator Shoes and Screens, Cleaner Screen, Shafting, and it is very necessary to show on your order the dimensions and to give a full description.

6th. Prepay Freight and Express charges on castings or extras (sample) sent us and put your name on the tag.
